FIELD OF ECOLOGY AND EVOLUTIONARY BIOLOGY
SUPPLEMENTAL GRADUATE APPLICATION

Name: _____ Email address: _____

Your area(s) of interest (choose from the list below):_____

animal ecology	limnology	population biology
applied ecology	oceanography	population ecology
biogeochemistry	paleobiology	systematics
community & ecosystem ecology	physiological ecology	theoretical ecology
ecological genetics	plant ecology	vertebrate zoology

Please review Cornell's Field of Ecology and Evolutionary Biology Website at
http://www.eeb.cornell.edu/field/EEB.html

1. After having viewed our web page, which faculty member(s) are you potentially interested in working with? (This is an important question to help us guide faculty to review your application.)

2. Please describe in 500 words or fewer any research experience you have had that might be relevant to your graduate study at Cornell.

3. Please give us a brief description (500 words or fewer) of what kind(s) of research questions you might like to explore as a graduate student. Please remember that this is in no way a contract for what you would do as a student at Cornell. It is intended to give us an indication of where your research interests are headed and a glimpse of how you would approach research in ecology or evolutionary biology.
